About Us

Since 1921, Stromberg's has been a trusted name in premium poultry supplies, proudly serving backyard hobbyists and professional poultry keepers alike. From hatchery services to everyday essentials, we offer everything you need to care for your flock—all in one convenient place.

In 2019, we expanded our flock—literally—when Mann Lake, a beekeeping supply company founded just down the road in Hackensack, MN, acquired Stromberg's. Today, Stromberg's is still run by Eric Stromberg, the founder's great-grandson, keeping the family tradition alive while reaching even more customers—many of whom are passionate about both bees and birds.

With over a century of experience, we're more than just a supplier—we're your partner in poultry. Backed by friendly customer service and a commitment to quality, Stromberg's continues to help flocks thrive, one bird at a time.

Incubator Guide

Discover our comprehensive range of incubators at Stromberg's, meticulously chosen to simplify your incubation projects. Incubators play a pivotal role in regulating four essential environmental factors crucial for successful egg hatching: temperature, humidity, airflow, and turning. By mastering these elements, we create optimal conditions for developing healthy, hatching eggs.

KEY ELEMENTS OF CONTROL IN INCUBATORS

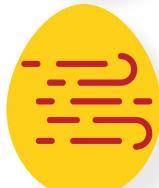

While incubators may vary, they universally focus on controlling key elements:

Temperature Control: Electric heating elements manage temperature within the incubator, a critical aspect of the incubation process. The finest incubators ensure proper airflow over the heating elements and facilitate easy cleaning. Maintaining a temperature of 99.5 degrees is imperative for effective incubation.

Humidity Management: Humidity is crucial for developing the air sac in the egg and preventing the membrane from becoming too tough for the chick to break through. Control humidity using a water pan or an incubator-integrated humidification unit that heats the water. Adjust humidity higher three days before hatching as your incubator's manual will suggest.

Airflow Optimization: Eggs are porous, allowing oxygen to reach the developing chick. High-quality incubators provide consistent airflow without compromising temperature and humidity stability.

Turning Consistency: Regular egg turning prevents the bird from adhering to the egg's sides during development. However, during the three days leading up to the hatch day, cease turning the eggs. This allows the chick to orient itself within the egg, ensuring it can access the air sac before breaking through during hatching.

Chick-Bator

PP127

\$119.99

Unlike other plastic incubators, the CHICK-BATOR is designed to insulate and warm eggs uniformly, similar to a polystyrene Hova-Bator. It includes an easy-to-read temperature display, a crystal-clear top, an insulated plastic base, a plastic grid floor, and an auto-fill water tank. The thermostat can be set to any temperature required for bird eggs and can also be adjusted for reptile eggs down to 80°F, provided the room temperature is low enough to support it. The auto-fill trough system maintains proper humidity levels. Turner sold separately (compatible with PP136 Chicken Egg Rack Turner or PP135 Quail and Chicken Egg Rack Turner). 110VAC. Without an automatic turner, the incubator will hold 50 duck or chicken eggs or 130 quail eggs.

Chick-Bator CL

PP128

\$129.99

The CHICK-BATOR CL is a 12-volt incubator designed for classrooms and labs. It comes preset for bird eggs—just plug it in, add water for humidity, and place your eggs. The microprocessor thermostat regulates temperature automatically and displays both temperature (°F/°C) and humidity. Built-in sensors prevent overheating, and the thermostat remains accurate even with changes in room conditions. Unlike other plastic incubators, the CHICK-BATOR CL is insulated to warm eggs evenly, similar to a polystyrene Hova-Bator. It includes a clear top for easy viewing, an insulated plastic base, a grid floor, a day counter, and an auto-fill water tank that maintains proper humidity. The thermostat can be adjusted for all bird egg needs and can be set as low as 80°F for reptile eggs (as long as room temperature allows). Without an automatic turner, it holds up to 50 chicken or duck eggs or 130 quail eggs.

Stromberg's Tip:

A quality thermometer and hygrometer are must have tools for incubating and raising chicks!

IN AN INCUBATOR: Keeping the right temperature and humidity is key to a good hatch. A thermometer and hygrometer help you create the best conditions for your eggs.

IN A BROODER: Young chicks need steady warmth. A thermometer helps make sure their space stays at the right temperature for their age.

PP616	Large Plate Cover	\$34.99

Safe alternative to heat lamps! Has two sizes and would be ideal for 20 to 50 chicks or waterfowl. Uses a tenth of the electricity of typical suspended infrared lamps, because the chicks are in contact with the warm underneath surface. This brooder grows with your chicks with the adjustable legs. These brooders are also much safer than using heat bulbs, which when left unsecured can start barn fires. Don't forget your clear plastic covers to keep chicks from climbing on top of the brooder. Pairs well with our 1 Liter Drinking Bottle with Hinged Lid (PW313).

Sweeter Heater Chick Brooders

PP654	For up to 35 chicks - 11" x 16"	\$120.99
PP653	For up to 65 chicks - 11" x 30"	\$159.99
PP655	For up to 85 chicks - 11" x 40"	\$174.99
PP609	Stainless Steel Heat Lamp Tripod	\$14.99

This is an excellent safe and low-power brooder for your chicks. A non-breakable, energy-efficient, long-lasting (three-year warranty), sealed/washable, and reliable specific area heater. Excellent for a brooder heater for chicks, you can also use this as a heat source when your birds are cold. The Sweeter Heater pairs perfectly with the Stainless Steel Tripod.

New locking lid design virtually eliminates lid blowing off. Newly designed rain/weather shield has 3 $\frac{1}{2}$ " sides to prevent feed getting wet in rainy conditions. Diameter of shield is 36". Flow rate is adjustable by mounting feeder pan to body at ideal feed flow rate. Instructions included. Ships from Manufacturer

Weatherproof!

900 lb Gamebird Range Feeder

DSPH675	\$1,050.99
---------	-------------------

Low & wide rain shield reduces the amount of rain that can blow into the pan during a heavy storm. Large pan circumference provides more feeding space for birds, which results in fewer feeders per pen. Narrow stepped pan design to reduce the amount of fines that can build up in the pan. Six uniquely designed support legs that will not allow feed to block up behind them, preventing mold build up. Adjustable feed flow (1.25" to 3.25") opening 45° cone to ensure adequate feed flow into the pan. Easy to open/close lid that can adapt to fit an automatic feed line. Large capacity reduces the number of times you need to fill each feeder. 27.5" wide opening to allow for easy filling either by hand or with an auger. Ships from Manufacturer

- Heavy-duty construction - 380 denier 20 ply poly strands

This high quality heavy duty game bird netting is just what you need to contain your game birds. The heavy duty netting is capable of withstanding 85 pounds. It is made with UV resistant polyethylene which is made to last 10 years or more in the field.

The netting is knotted, which is known for not getting caught in peepers and pins if you are protecting your birds from cannibalism or pecking. This heavy duty netting is perfect for areas that receive snow. This style of netting can also be used in any poultry area that you may want to protect your birds from aggressive birds of prey. When your chickens matter to you and you can't keep the birds out of the chicken run, this product will be sure to protect them. Use rings and ring clincher (sold separately) to install or simply use the zip ties. Netting is non-returnable once taken out of the original packaging.

Electric Fencing Made Simple

Electric fencing is an easy and humane way to keep your animals safe and predators out. It uses small electric pulses to teach animals to respect the fence without harming them.

How Electric Fences Work:

An energizer sends short bursts of power through the fence. When an animal touches it, the current flows through the animal and back to the ground, giving a safe but firm shock. This teaches animals to stay away from the fence.

Two Types of Systems:

Regular (Hot-Ground) Fences:

- The fence wires carry a positive charge, and the earth acts as the negative return.
- When an animal touches the fence, electricity flows through the animal into the ground, completing the circuit.
- Works best in moist soil, where conductivity is strong.

Positive-Negative (Hot-Hot) Fences:

- Alternating wires carry positive and negative charges.
- When touched, the animal completes the circuit by contacting both wires — no soil moisture required.
- Ideal for dry, rocky, or frozen areas where grounding is weak.

Polywire Fencing:

Polywire is another great tool for electric fencing. It is visible, lightweight, and easy to install. It offers great protection for your birds, cows, goats and even horses while keeping out skunks, minks, and foxes. Be sure to set this fencing up with T-posts and insulators for a quick, sturdy setup.

The Bottom Line:

Electric fencing is safe, effective, and easy to use. With the right energizer, netting or polywire, and grounding, you can protect your flock year-round and more your setup whenever you need to.

Do not forget the energizer and your necessary fencing accessories!

PC161 6-Hole	\$319.99
PC162 8-Hole	\$369.99
PC163 10-Hole	\$449.99

Available in 4, 6, 8, or 10-hole options, these galvanized nest boxes let you switch each compartment between rollout or conventional style. Rollout keeps eggs clean, while conventional is perfect for broody hens. Each box includes a metal flap for easy collection, flip-up plastic perches for simple cleaning, and both rollout and 12"x12" conventional nest bottoms. Some assembly required.

My Cozy Nest

PP198 Single	\$35.99
PP199 10 Pack	\$319.99

The Cozy Nest offers the perfect place for your birds to lay their eggs. The black out curtain provides a safe and dark place that your birds will naturally gravitate to for egg laying. The ventilation grills provide the necessary air flow so the birds feel comfortable in the nest but not exposed to drafts. The molded plastic is easy to clean and with the built in lip the birds do not kick the shavings out of the nest. We recommend putting wood shavings or excelsior nest pads in the bottom of the My Cozy Nest.

Galvanized Nesting Box with Plastic Baskets

PC220 Single	\$49.99
PC221 Double	\$69.99
PC222 Triple	\$119.99

Have a small flock? Use our one, two, or three hole roll out nest boxes in your coop. The plastic construction allows for easy sanitation when needed. The roll out egg feature keeps eggs cleaner and prevents hens from pecking the eggs.

New!

GoodEgg Brush L/XL

PP042 **\$19.99**

Meet the easier way to clean your eggs. The GoodEgg brush uses over 650 silicone nubs to gently scrub dirt and debris off your eggs quickly and effectively. Its special nest-shaped design helps water drain and lets the brush dry fast. Need extra cleaning power? Just squeeze the rim to use the built-in squeegee edges for quick spot cleaning.

New!

GoodEgg Wash

PP041 **\$14.99**

Say goodbye to chicken coop nasties. GoodEgg Wash breaks down organic contaminants (including salmonella) through the power of naturally derived enzymes. And bonus: this 99% organic food-grade cleanser will not penetrate the eggshell. So when you're ready to crack into your backyard those backyard butt-nuggets, you can do so with egg-ceptional confidence.

Processing Essentials

Don't get caught without the right equipment. Our processing tools help keep you safe while humanely processing your harvest.

New!

Butchering Tool Kit

PP192 **\$39.99**

- 1 PP840 5" Boning Knife
- 1 PP851 Lung Remover
- 1 PP847 NSF Certified Sticking Knife

Make poultry processing simple with this all-in-one kit. Includes three essential knives. Built with high-carbon steel blades and ergonomic, slip-resistant handles, these tools make butchering cleaner, faster, and easier. Great for beginners or experienced processors.

Cutting Glove

Sizes S-XL (CL172-CL175) **\$17.99**

No longer worry about cutting your fingers while culling your birds. These lightweight gloves will keep your fingers and hands safe while using your sharp knife.

5" Boning Knife

PP840 **\$14.99**

A must for poultry processing and in the kitchen. This knife is for removing the bones of your fowl carcass, evisceration and as an all-around multipurpose butchering knife. It has a 5" high-carbon steel blade and a slip-resistant polypropylene handle.

NSF Certified Sticking Knife

PP847 **\$15.99**

This NSF Certified Sticking Knife has a narrow blade knife and is used to stick poultry and general evisceration. The 3" blade is made out of high-carbon steel and the polypropylene handle is textured to ensure being slip-resistant.

Pinning Knife

PP841 **\$13.99**

Helps remove those stubborn pin feathers. Use this knife to scrape the pin feathers out of the bird. The blade is 2.5" long and made out of high-carbon steel. The handle is a textured, slip resistant polypropylene.

Skinning Knife

PP844 **\$32.99**

This is a curved skinning knife that is especially useful when "parting out chicken", meaning separating legs, wings breasts etc.

9" Heavy Duty Shears

PP855 **\$52.99**

9" Heavy Duty Shears used for poultry processing.

Gizzard Scissors

PP848 **\$66.99**

Made of hot forged, thru-hardened, fully double-plated chrome over nickel, this poultry shear is great for poultry and food processing. High leverage with multipurpose use. Made in Italy.

Lung Remover

PP851 **\$14.99**

Save time and reduce fatigue with this great tool. Reduces the pain and fatigue on your fingertips from manually scraping the lungs out of birds. Makes processing faster by using the right tool for the job!

Clauss Poultry Shear

PP849 **\$55.99**

These specially designed shears are curved to the right to help you when you are processing your poultry. It is really useful when it comes time to cut the heart and liver. They are made out of a cutlery grade steel that is double-plated with chrome over nickel to protect against rust and stains.

Knife Sharpener

PP846 **\$33.99**

This knife sharpener is a must for every poultry butchering tool kit. Having sharp knives makes the job easier and safer! Blue diamond stones sharpen and hone creating a new edge. White ceramic stones polish the edge. Safe and easy to use.

Bird Seasonality Guide

New to ordering chicks and poultry? We've got you covered. Our Bird Seasonality Guide is here to help you order your birds at the right time each year.

Availability:

Bird availability changes throughout the year. Some breeds hatch regularly, while others are limited or sell out quickly. If you're looking for something specific, give us a call — ordering early gives you the best chance of getting the birds you want.

Scheduling:

Once you place your order, we'll schedule it for the earliest ship date that fits the breeds you chose. You'll get an e-mail with your confirmed date (or a phone call if we don't have an e-mail on file)

Seasonality:

Many poultry breeds are seasonal layers, which means they only hatch during certain months. For example, geese don't typically begin hatching until March. If you're hoping for seasonal or rare breeds, it's best to order early so you're on the list as soon as hatch time begins.

Shipping & Delivery:

Your birds ship through USPS Priority Mail on your scheduled date. They usually arrive at your local post office in about 48-72 hours, and the post office will call you when they're ready for pickup. Before they arrive, make sure your brooder is warm, and feeders and waterers are ready to go.

Guarantee:

We guarantee live delivery on every bird order. If you experience any losses, please call us within 48 hours of receiving your shipment. (See page 130 for full details.)

When to Order: At a Glance

Select your hatchlings and plan to purchase as early as possible due to high demand.

Raise Your Own Meat

Cornish Rock Cross are the best meat birds on the market! These cross breed birds are the ideal bird to raise your own meat right in your backyard! Check out why we love these birds and you will, too!

Fast, Efficient Growth:

- Reaches market weight quickly—typically 6-8 weeks
- Ideal for anyone wanting a fast turnaround on meat production
- Amazing feed conversion = more meat per pound of feed than most breeds

Exceptional Meat Qualities:

- Broad breast, plump thighs, and excellent carcass finish
- Tender, mild-flavored meat with great customer demand
- Consistent uniformity for home processing or small-scale selling

Great for Backyard & Small Farms:

- Perfect for homesteaders who want to raise their own food
- Easy to manage in tractors or pasture pens
- Works well with rotational grazing setups

Easy to Process:

- Clean plucking due to feather structure
- Broad, easy-to-work with carcass ideal for home butchering
- Customers love the yield and presentation

Predictable, Reliable Results:

- Uniform flock growth makes planning processing dates simple
- Excellent consistency from batch to batch
- A top choice for both new growers and seasoned producers

Gentle Temperament:

- Calm and easy to handle—great for beginners
- Tolerant of close quarters when managed properly
- Suitable for families raising meat birds for the first time

Cornish Rock Cross: Pasture vs Barn-Raised

Category	Pasture-Raised	Confinement/Barn-Raised
Growth Rate	Slightly slower (adds 1-2 extra weeks), but still efficient growth	Fastest growth; typically 6-8 weeks to processing
Feed Efficiency	Good; birds burn more energy walking/foraging	High; best feed-to-meat conversion
Flavor & Meat Quality	More developed flavor; firmer texture; yellow-tinted fat	Mild flavor; very tender; consistent white fat
Environment Benefits	Helps fertilize pasture; regenerative-friendly	Easier to control temperature, moisture, and cleanliness
Processing Uniformity	Slight variation in size due to activity levels	Most uniform weights and carcass sizes
Cost	Lower infrastructure costs but higher labor	Higher initial setup cost but lower daily labor
Best For	Homesteaders, regenerative farms, and small pasture operations	Growers wanting predictable, fast results with minimal risk

Bantam

Not Sexed Only

Bantams are considered a miniature chicken and can be a third to a fifth the size compared to a standard chicken. Bantams are popular for pets, for showing, for being good broody mother hens and great for small backyards where space is limited. They come in many colors and with feather legged and clean legged types. Most of these bantam breeds are sold as not sexed but a few breeds are offered with options of pullets (female chicks). Most bantams hatch and ship between February and August, and you can start booking your order for these breeds/colors in January.

**Stromberg's Tip:**

Bantam chickens are fun, friendly, and full of personality. They're small, easy to handle, great for backyard spaces, and come in tons of beautiful colors and feather types. Their sweet temperaments make them a favorite for families, first-time chicken keepers, and anyone who enjoys birds with big charm in a tiny package.

VitaMetz Waterfowl Boost

PH553 **\$13.99**

VitaMetz is an easy-to-use vitamin and electrolyte blend made specifically for ducks and other waterfowl. It supports birds of all ages during stress, travel, or low feed intake and includes the ideal amount of niacin for strong, healthy legs.

Each resealable 4 oz pouch includes a 1 tsp scoop. Mix 1 scoop per gallon of drinking water—one bag makes 25 gallons. Use right after your birds arrive for a quick boost, for the first 5 days after hatch, and 3–4 days per month for ongoing support. Great after stressful events or antibiotic use.

Goslings

White Chinese

One of the smallest domesticated geese breeds! Has a long neck and snow-white feathers. Very talkative, making them the perfect choice if you want to be alerted to intruders. Mostly used for weeding purposes. Great for orchards, gardens, and pastures. Prolific egg-layer, laying around 30-45 eggs per year. Origin: China.

Quail

Not Sexed Only

Baby quail are delicate to ship due to their small size. They require a high level of protein (28%). You can feed them a turkey starter if special game bird feed is not available. We advise grinding feed in a blender to powder consistency.

Light Brigade Homer Pigeons

LD697	Pair	\$3,000.00
LD897	Female	\$1,520.00
LD797	Male	\$1,520.00

Unlock proven winning genetics from these two standout race birds—both tied for first in the 2025 Hoosier Classic Pigeon Race, held in October 2025. Now you have the opportunity to bring their exceptional bloodlines directly into your loft and give your team the boost it needs to compete at the highest level.

Light Brigade received equal first, 34th place, and Jeans Ida Won also had equal first 41st place. Both birds showed consistent, impressive performances throughout the races leading up to the final.

These pigeons are direct descendants of Gold Winner, their mother, who placed 29th in the 2024 Hoosier Classic Final. This is your chance to own direct children from proven winners—and select the genetics that best fit your loft's goals.

Genes Ida Won Homer Pigeons

LD898	Female	\$1,820.00
LD798	Male	\$1,820.00

This pairing brings together two Hoosier first-place winners—a rare opportunity to add proven excellence to your loft. Both the cock and hen achieved equal first place, creating a unique mating you won't find anywhere else. Elevate your loft with elite quality, proven performance, and genetics built to win.

LIGHT BRIGADE & GENES IDA WON ARE TIED FOR 1ST PLACE

New!

Tosca x Golden Lightning Homer Pigeons

LD150	Pair	\$2,000.00
LD550	Female	\$1,020.00
LD450	Male	\$1,020.00

This pairing is truly special—featuring Tosca, the foundational hen who claimed 9th place in the 2021 Hoosier Classic Final—paired with Golden Lightning who achieved 37th place in the 2024 Hoosier Classic and is the full sibling of Gold Winner.

This is the rare opportunity to breed directly from Tosca, preserving her elite traits and racing pedigree intact. Paired with Golden lightning a successful cock, this coupling offers unmatched potential for breeding winning birds and consolidating high-performance heritage—a must-have for serious breeders building a legacy loft.

New!

Gold Winner x Giacomo Homer Pigeons

LD151	Pair	\$2,750.00
LD551	Female	\$1,395.00
LD451	Male	\$1,395.00

Gold Winner stands out with a 29th place finish in the 2024 Hoosier Classic Final (350 miles). Among her siblings, only she and her full brother cracked the Top 40—with him placing 37th—making them uniquely elite in their cohort.

Her mate, Giacomo, placed 78th in the 2022 Hoosier Classic Final and descends directly from Tosca, the loft legend who finished 9th in the Hoosier Classic. This combination doubles down on superior genetics and established performance, offering a high-potential breeding unit for enhancing racing capabilities in future generations.

New!

Princess Ida Win x Elite Wind Homer Pigeons

LD152	Pair	\$1,500.00
LD552	Female	\$770.00
LD452	Male	\$770.00

Princess Ida Win is a high-caliber racer who captured 35th place in the 2023 Hoosier Classic 350 mile Final, demonstrating both stamina and speed. She hails from a strong maternal line rooted in Tosca, the distinguished 9th-place finisher in the Hoosier Classic, and is closely related (her dam is a full sister) to Giacomo, who secured 78th place in the 2022 edition.

Her paired cock Elite Wind brings his own merit to the union—earning 65th place in the 2024 Hoosier Classic Final. Together, this pairing blends racing reliability with proven genetics: a promising foundation for breeders aiming for consistent competitive performance and durable offspring.

SALES, FREIGHT & WARRANTY INFORMATION

WARRANTY - Stromberg's warrants its equipment to be free of functional defects in material and workmanship. Returns must be made within 30 days. You may be asked to return the merchandise in order to receive a refund. Refunds can include the purchase price along with all transportation charges if the product is found defective. Warranty does not cover damage to equipment arising from alteration, abuse or use of product for other than its intended purpose. Photos must be supplied for damaged product replacement.

DAMAGED FREIGHT - All merchandise is shipped "F.O.B. Shipping Point". This is a legal term that means all merchandise becomes your property as soon as we give it to the freight carrier. The freight carrier is responsible for complete and safe delivery of your merchandise. It is your responsibility to inspect the merchandise when it is delivered. If the freight carrier fails to deliver your merchandise in good condition, it is your responsibility to note the damage before signing for it. Contact us so that we can file a claim with the carrier on

your behalf. Photos of the package, shipping label and damaged merchandise are required to file a claim and receive a refund or replacement.

SPECIAL ORDERS - Special orders may require a deposit.

PICK UP ORDERS - A call before you stop by helps us serve you in a more timely manner. In most cases, we will have your order ready for pick up upon your time of arrival if given prior notice.

LIABILITY - Our liability is limited to the purchase price paid for any item. We make no warranty or representation, express or implied except all products conform to the description provided by the manufacturer on sales literature or product labels.

RETURNED MERCHANDISE - If you need to return an item, we accept returns under the following conditions:

1. Contact us for a return authorization number.
2. Item must be in like new condition.
3. Item must be returned within 30 days of receipt.
4. Original receipt is required.
5. In most cases a restocking fee of 20% will be charged. We cannot accept returns on hazardous materials.
6. Returns will be processed within 14 days of receiving of the returned product.
7. Stromberg's is not responsible for return items lost in transit. You must retain your own tracking numbers and handle your own claims on return items.

REPLACING MERCHANDISE - When Stromberg's ships a replacement product to you due to damage or an incorrect product, there will be an additional charge for the new product sent. However, a credit will be applied at the time of the return of the incorrect product.

PRICES - Stromberg's will invoice all orders on the basis of prices which are in effect at the time of shipment. We reserve the right to change catalog prices if we deem it necessary. Please feel free to confirm prices at any time. Stromberg's is not responsible for typographical errors.

ORDER DISCREPANCIES - Check all orders immediately upon receipt and contact us within 10 days on any discrepancies.

PRODUCT SUITABILITY - Due to many state and local codes and regulations regarding sales, construction, installation and use of products for certain purposes, we cannot guarantee compliance in every situation. We attempt to assure that all products comply with state and local codes and regulations, so before you purchase and use a product please review both the product application and local codes and regulations. Be sure that the product, its installation and its use will comply with those codes and regulations.

HOURS - Call or visit our website for store hours. Our phones are answered 7am to 7pm CST for ordering and customer service. Place orders by phone at 888-697-2444, by fax at 218-216-1042, or by email address at info@strombergschickens.com Orders may also be placed online at www.strombergschickens.com

STATE SALES TAX - When applicable, we are required to collect sales tax by law. Exemptions for sales tax will be allowed if you have either a signed Certificate of Resale or an Exemption Certificate. The tax forms vary by state, please call for details. Law requires that we have these certificates on file before any tax exemption may be applied.

HOLIDAY CLOSINGS - We are closed New Year's Eve, New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and the following Friday, Christmas Eve and Christmas Day.

CREDIT CARDS - Stromberg's reserves the right to preauthorize credit and/or debit cards. No money leaves your account until the purchase clears but the hold is active until the actual transaction is settled. When there's a hold on your account, it lowers your available balance. Stromberg's is not responsible for overdraft fees resulting from the pre-authorization of your card.
